Mahinder Inbasekaran

Product Designer | UI/UX Designer

Chennai (India) | (+91) 9445264707 | mahindersekaran@gmail.com

Portfolio: mahinderinbasekaran.in

I design at the intersection of user behaviour and business outcomes — not just interfaces. With 5.5+ years of experience across fintech, SaaS, and platform products, I specialise in identifying where user experiences break and solving those problems in ways that improve both usability and business performance.
My work focuses on simplifying complex workflows, improving decision-making, and building scalable product systems that drive measurable impact such as increased engagement, reduced churn, and improved operational efficiency.

RECOGNITION & AWARDS

- Contributed to the redesign of Youvati 2.0, leading to IIMA Ventures incubation ($50K grant)
- Winner — Bharat Livelihood Challenge 2025 (IIMA Ventures & Apna)
- Winner — Bharat Pitchathon 4.0 (Headstart Network Foundation)
- Selected — Bharat 10M Accelerator (Top 8 startups nationally)

EXPERIENCE

Daivtech Solutions Private Limited — *Senior UX/UI Designer* *Jan 2026- Present*

- Led redesign of a fragmented admin platform where operational inefficiencies were slowing down internal teams. Simplified core workflows and reduced navigation complexity, enabling teams to manage operations more efficiently and scale without increasing manual effort.
- Built reusable components and structured dashboards, improving consistency across the product and reducing design-to-development friction.

Creativeeye Software Technologies Private Limited — *UX/UI Designer* *May 2025 - Jan 2026*

Nexdha Fintech Admin Platform

- Identified a critical gap where admins managing 50+ merchants relied on intuition for risk detection. Introduced the Net Change concept, transforming a flat transaction table into a prioritised decision-making system — improving clarity and enabling faster, more accurate actions.
- Designed key fintech workflows (wallet history, onboarding, export logs) by translating complex financial data into intuitive interfaces, reducing cognitive load and improving usability for high-frequency tasks.

UPI Gram — Government-Linked Rural POS Infrastructure

- Designed an end-to-end onboarding system for a government-linked rural payments infrastructure, enabling both field agents and bank operators to complete verification workflows efficiently across low-connectivity environments.
- Built transaction tracking dashboards that provided real-time visibility into fund movement, improving operational transparency and trust in the system.

Empower Pragati — *UX/UI Designer* *Jan 2024 - Apr 2025*

- Diagnosed a retention crisis in Youvati — a platform serving 15,000+ women beauticians through user research and usability testing, uncovering that core flows were driving drop-off rather than engagement.
- Redesigned the end-to-end experience, resulting in a 40% increase in engagement and 25% reduction in churn — outcomes that directly contributed to Youvati securing IIMA Ventures incubation and a USD 50,000 grant.
- Redesigned the admin panel to streamline business management, appointment tracking, and content moderation — reducing ops overhead at scale across 15,000+ users.

Aptimist Techno Solutions — *UX/UI Designer* *Jan 2022 – Nov 2023*

- Improved product adoption and usability across multiple client projects through iterative design and usability testing.
- Translated complex business requirements into clear, intuitive user experiences, bridging the gap between business needs and user behavior.

Aptimist Techno Solutions — *Graphic Designer* *Jun 2020 – Dec 2021*

- Built brand identity systems and campaign assets for clients — developing an early sensitivity to how visual decisions shape user perception, which directly informed my transition into product design.

TECHNICAL SKILLS

Product & Strategy:	Product Strategy · Problem Framing · UX Research · Usability Testing · Information Architecture · Design Systems
Business Impact Focus :	SaaS Platforms · B2B Platforms · Dashboards · Workflow Optimization · Data Visualization · Conversion Optimization
Execution :	Wireframing · Prototyping · Interaction Design · High-Fidelity UI · Responsive Design · Accessibility
Tools:	Figma · FigJam · Framer · Whimsical

Education

Bachelor of Engineering – *Mechanical Engineering* *2014 - 2018*

SRM TRP Engineering College, Trichy

Certifications

Advanced UX/UI Design Program – *Aspira Design, Chennai* *2022 (6 months)*
